

IN THE SPECIFICATION

Please replace paragraph [0017], with the following rewritten paragraph:

A1  
Turning now to the operation of the present invention, the program implementing the system of the present invention is started (potentially at system start-up time) and readies itself to receive requests. In the embodiment shown in Fig. 2, the system also has installed its icon 200 in the system tray of the WINDOWS ~~Windows~~ operating system. (In an alternate embodiment, the system is started only when needed and does not remain in the system tray.)

Please replace paragraph [0020], with the following rewritten paragraph:

A2  
In yet another alternate embodiment, the browser 210 and the system have the greatest integration. Without requiring that the user highlight the text in the text field 220a, the system nonetheless can obtain the text in the text field 220a. The request is made of the browser 210 when the user clicks on the icon 200 or utilizes a defined hot-key combination. Such a hot-key combination is captured through the use of ~~Windows~~ hooks in the WINDOWS operating system or any other technique that allows the system to receive keystrokes.
